### SKB OWNERS/FOUNDERS: DAVE SANDERSON & STEVE KOTTMAN

### LIFETIME WARRANTY

SKB injection-molded, roto-molded, and ATA-rated hard case products are fully warranted against defects in materials and craftsmanship to the original owner for the lifetime of the case. SKB will repair or replace any product found to be defective, however SKB DOES NOT REPLACE CASES FOR DAMAGED HARDWARE. All locks, handles, and wheels are designed to be field replaceable, take just minutes to install, and will be supplied to you at no charge via US mail.

### OUR STORY

In 1977, two ambitious college students developed the first SKB case in a small Anaheim, California garage. What would eventually become the industry's premier lightweight molded guitar case was just the first of many innovations that have since cemented SKB's global reputation as a leading manufacturer of superior equipment transportation solutions. These solutions are helping diverse industries around the world—from music and photography to sports, aerospace, military, industrial, and beyond—to protect their livelihoods, build better products, and get the job done.

If our 40 years of steady growth have taught us anything, it's that we have our customers to thank for giving us the opportunity to excel; it's their challenges that have allowed us to develop and grow. We at SKB are grateful for the continued trust and loyalty of our customers, and we remain dedicated to the assurance that every case with an SKB logo has been manufactured with an unconditional commitment to unsurpassed quality.

One of our injection molders in action

## INJECTION MOLD

This is SKB's latest venture in our quest to provide the most innovative hard shell case products. Injection molding is an expensive investment that leaves no room for error. Made with extreme pressure, even the smallest injection molded part requires a very large and heavy mold (some of SKB's molds are nearly 20 tons!). The injection mold process produces many of our parts—such as our patented Trigger Latches—and our gasket-sealed waterproof iSeries cases are proving to be popular transport solutions for everyone from touring musicians to military personnel. Never before has an ATA flight case been so advanced and lightweight.

Molds rotating during production

## ROTO-MOLD

In 1997, SKB invested in roto-mold machinery. These molds are ideal for making large and cylindrical cases. The PE roto-mold material starts as a fine powder that is measured according to the size of the case. The material is then sealed up in a multi-piece aluminum mold, fixed on a biaxial rotating wheel, and heated to 800° in a very large oven while the mold constantly rotates. The powder melts and coats the inside of the mold and, after cooling, the cast is disassembled and the new case is removed. Roto-molding is great for providing maximum transport protection and impact resistance.

Vacuum mold for keyboard case

## VACUUM FORM

Also known as thermal form, this was the first and most recognized "SKB Style" case. This method is very popular for everything from guitar and band instrument cases to golf cases, rifle cases, and more. In 1990, SKB developed the first vacuum formed rack case. Acrylonitrile Butadiene Styrene (ABS) or Polyethylene (PE) is formed into solid sheets of material. The sheets are then heated and vacuum formed around aluminum castings, thus taking the shape of the mold. The edges have a distinctive aluminum valance that provides rigid construction as well as a secure fit. Vacuum formed products are known for their light weight and extreme durability.

## iSERIES INJECTION MOLDED WATERTIGHT CASES

- High-strength, lightweight, injection molded polypropylene copolymer resin
- Watertight gasket seal
- Easy to use TSA locking trigger latches
- Convenient quiet-glide wheels
- Plush lined EPS molded interior
- Comfort grip rubber over-molded handles
- Self-sealing large accessory compartments
- Secure stackable design
- Automatic pressure equalization valve
- Lifetime warranty
